- Build and maintain trusting relationships with key customers, clients, partners, and stakeholders

### Data Analyst & Digital Product Consultant

SEPT 2024 - Present, CHICAGO, IL

- Fractional Business Operations Lead - Heavenly Yin Studios
- Independent data projects
  - Data operations analysis and automation
  - Data warehousing, modeling, & analysis
  - Data reporting & visualization
  - Data governance
- Head of Product @ Slightly More Awesome: <https://www.slightlymoreawesome.com/>
- Head of Product @ Stealth Start-up

### BenchPrep - Data Product Analyst

JAN 2022 - SEPT 2024, CHICAGO, IL

<https://www.benchprep.com/reporting-data>

- Migrated and enhanced white-labeled embedded analytics and self-service data products from legacy vendor systems: improved performance, ease of access, and saved \$100k's in subscription and usage costs.
- Designed and automated billing reports for dozens of enterprise customers, saving 100's of man-hours per month,

increasing customer confidence, and supporting platform usage overage billing

- Ideate, research, recommend, mock-up, and demo new data products based on stakeholder business requirements.
- Gather business requirements from non-technical stakeholders, prioritize features per product strategy, and refine into actionable user stories.
- Deployed new embedded dashboards and reporting features to enterprise customers with 0 downtime.
- Delivered bespoke reports and analytics from SaaS data to answer critical customer and internal learning business strategy questions, driving renewals, professional service revenue, and contract growth
- Produced reports using advanced Excel/Gsuite spreadsheet functions.
- Utilized data visualization and queries to effectively communicate business insights through ad hoc reporting.
- Improved decision-making processes with accurate data analysis and visualization techniques.
- Collaborated with cross-functional teams to ensure data integrity and accuracy, resulting in better-informed decisions.
- Extract, transform, load, and integrate application data across platforms for analysis and reporting product delivery
- Developed & maintained curriculum & documentation for business intelligence and data warehousing tools, then used it to train customers and cross-functional teams, scaling data literacy & report development and delivery initiatives, and enabling customers on high-margin self-service analytics products.
- Analyzed SaaS software systems and reporting products to identify, document, translate, and utilize application metadata and data lineage for reproduction, translation, migration, and improvements in business intelligence.
- Enhanced business efficiency by identifying trends and patterns in complex datasets.
- Provided actionable insights through comprehensive reports and dashboards, supporting strategic initiatives.
- Streamlined data access for remote teams by implementing cloud-based data management solutions.
- Conducted comprehensive data analysis to support strategic planning, leading to more informed decision-making.
- Facilitated knowledge sharing by creating centralized data repository accessible to all relevant parties.
- Improved data governance practices, ensuring compliance with regulatory standards and internal policies.
- Facilitated cross-departmental data integration, enhancing overall data coherence and utility.
- Conducted ad-hoc analysis to address urgent business questions, facilitating rapid response to market changes.
- Streamlined reporting processes, resulting in faster turnaround times for monthly performance reports.
- Enhanced team's analytical capabilities with training on latest data analysis tools and techniques.
- Enabled more personalized customer experiences by analyzing behavior patterns and preferences.
- Automated routine data analysis tasks, freeing up time for more complex analysis.
- Improved data visualization techniques, making insights more accessible to non-technical stakeholders.
- Enhanced data accuracy by automating data cleansing processes, significantly reducing manual errors.
- Analyzed data to identify root causes of problems and recommend corrective actions.
- Developed customized reports, summarizing and presenting data in visually appealing format.
- Created data models to support decision-making processes.
- Created dashboards to monitor and track key performance indicators.
- Updated and developed scripts and queries to extract and analyze data from multiple sources.
- Provided technical support for troubleshooting analytics and reporting issues.
- Collaborated with stakeholders to identify business needs and data sources.
- Generated ad-hoc reports to evaluate specific business requirements.
- Developed complex dashboard and reporting tools to track business performance metrics.
- Implemented business intelligence solutions to increase operational efficiency.
- Developed and implemented data governance policies and procedures.
- Deployed predictive analytics models to forecast future trends.
- Developed and maintained data warehouses and data marts to support business operations.
- Suggested and implemented product development and team management process improvements to cross-functional and customer stakeholders, improving efficiency and cutting production costs.
- Optimized data access and storage to improve performance of analytics systems.
- Enhanced team productivity by implementing agile methodologies, leading to more efficient project completion.

## **BenchPrep - Manager, Learning Content & Conversion**

JUL 2020 - DEC 2021, CHICAGO, IL

- Delivered bespoke reports and analytics from SaaS data to answer critical customer and internal learning business strategy questions, driving renewals, professional service revenue, and contract growth
- Developed curriculum on organization's business intelligence and data warehousing tools, then used it to train customers and cross-functional teams, scaling data literacy & report development and delivery initiatives, and enabling customers on high-margin self-service analytics products.
- Enhanced customer satisfaction by resolving disputes promptly, maintaining open lines of communication, and

ensuring high-quality service delivery.

- Extract, transform, load, integrate, model, enrich, and QA application data across platforms for LMS product delivery
- Ideate, research, recommend, mock-up, and demo new data products based on stakeholder business requirements.
- Gather business requirements from non-technical stakeholders, prioritize features per product strategy, and refine into actionable user stories.
- Queried, analyzed, and visualized large, complex SaaS product datasets for insights
- Developed and maintained relationships with customers and suppliers through account development.
- Used industry expertise, customer service skills, and analytical nature to resolve customer concerns and promote loyalty.
- Suggested and implemented product development and team management process improvements to cross-functional and customer stakeholders, improving efficiency and cutting production costs.
- Presented product analysis insights to cross-functional teams to drive better business decision-making and to customers for better digital product development and enhancement decisions.
- Developed a strong company culture focused on employee engagement, collaboration, and continuous learning opportunities by mentoring employees for career advancement, fostering a pipeline of future leaders within the organization.
- Resolved staff member conflicts, actively listening to concerns and finding appropriate middle ground.
- Built high-performing teams through effective recruitment, onboarding, and talent development initiatives.
- Streamlined workflows by identifying bottlenecks in existing systems and implementing appropriate solutions.
- Developed comprehensive risk management plan, minimizing potential disruptions to business operations.
- Enhanced team productivity by implementing agile methodologies, leading to more efficient project completion.
- Enhanced product quality by instituting rigorous quality control procedures, resulting in fewer customer complaints.
- Achieved significant cost savings by renegotiating contracts with key service vendors, without compromising cutting operational costs while maintaining product and service quality
- Streamlined project delivery processes, significantly reducing time to market for new product launches.
- Established team priorities, maintained schedules and monitored performance.
- Evaluated employee performance and conveyed constructive feedback to improve skills.
- Maintained professional demeanor while troubleshooting customer pain points and recommending solutions.
- Recruited, interviewed, and hired employees
- Developed & implemented mentoring, upskilling, professional development and cross-training programs to maximize team agility and performance, and increase positive employee feedback and engagement
- Established performance goals for employees and provided feedback on methods for reaching those milestones.
- Set aggressive targets for employees to drive company success and strengthen motivation.
- Identified and communicated customer needs to supply chain capacity and quality teams.
- Launched quality assurance practices for each phase of development

## **BenchPrep - Senior Learning Content Manager**

OCT 2015 - JULY 2020, CHICAGO, IL

- Delivered hundreds of responsive online LMS courses → generated \$10M+ in annual SaaS revenue from enterprise partners, credentialing bodies, and certification organizations in a fast-paced, B2B SaaS start-up environment.
- Presented to and interviewed B2B customers to understand their business objectives, then developed suitable learning product solutions, and evangelize the SaaS LMS's value proposition.
- Ideate, research, recommend, mock-up, and demo new digital learning products based on stakeholder business requirements.
- Gather stakeholder business requirements, prioritize features per product strategy, and refine into actionable user stories.
- Extract, transform, load, integrate, enrich, and QA application data across platforms for LMS product delivery
- Streamlined workflows by identifying bottlenecks in existing systems and implementing appropriate solutions.
- Consistently met tight deadlines while managing multiple projects simultaneously, prioritizing tasks effectively.
- Conducted regular post-launch content audits & site metrics analysis to present content gaps and redundancies to customers.
- Evaluated launched products' usage data and user feedback to recommend product enhancements and future product roadmap initiatives, improving product management and future product quality.
- Enhanced team productivity by implementing agile methodologies, leading to more efficient project completion.
- Enhanced product quality by instituting rigorous quality control procedures, resulting in fewer customer complaints.
- Achieved significant cost savings by renegotiating contracts with key service vendors, without compromising cutting operational costs while maintaining product and service quality
- Organized professional development programs for staff, leading to improved performance and skill sets.

- Streamlined project delivery processes, significantly reducing time to market for new product launches.
- Recruited, interviewed, and hired employees; mentored junior team members for career advancement, fostering a pipeline of future leaders within the organization to promote positive feedback and engagement.
- Used industry expertise, customer service skills and analytical nature to design and recommend technical solutions to resolve customer concerns, address business needs, and promote loyalty.
- Maintained professional demeanor while troubleshooting customer pain points and recommending solutions.
- Developed detailed plans based on broad guidance and direction.
- Suggested and implemented product development and team management process improvements to cross-functional and customer stakeholders, improving efficiency and cutting production costs.
- Identified and communicated customer needs to professional service vendors and support teams
- Launched quality assurance practices for each phase of development
